HOW TO TAKE MEASUREMENTS

- A • Height:** To determine your height, stand up straight and measure the distance from the crown of your head to the sole of your foot.
- B • Breast / Chest:** Take the measurement over the fullest part of your bust.
- C • Waist:** Measure around the narrowest part of your waistline.
- D • Hips:** Measure around the fullest part of your hips
- E • Inner Leg:** With your leg stretched out, measure the inside of your leg from the crotch to the ankle bone.
- F • Body length:** In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point

(\*) Measure is taken from ground level; inseam is 10 cm shorter than inside leg, on average

(\*\*) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.
