

TRIATHLON_

62% POLYESTER
36% ELASTANE
1% POLYAMIDE
1% CARBON FIBER

- Intelligent compression for increased support and control, where and when it is needed
- Bonded seams for improved drag reduction and comfort
- Improved surface integrity for increased speed, power and durability
- Supremely light and elasticized fabric for complete comfort and freedom of movement
- Active carbon grid for a rapid drying suit that helps to regulate body temperature

INTELLIGENT COMPRESSION

POWER RETURN
CONSTRUCTION

71% POLYAMIDE
29% ELASTANE

- Innovative fabrics for optimal compression, minimum surface drag in the water and superior aerodynamics out of it
- Flatlock seams for complete comfort and softness
- Chamois insert with high elasticity, ultra rapid drying
- Extra-life lycra fibers for extraordinary durability
- Mesh panels for optimum breathability

EXTRA LIFE

EXCELLENT
COMPRESSION

OPEN WATER_

65% POLYAMIDE
35% ELASTANE

- Superb stability and body alignment during the stroke
- Z-Raptor+ fabric guarantees maximum compression and comfort
- Advanced low profile bonded seams for minimum drag
- Ideal for all strokes and distances

DRAG REDUCTION

EXCELLENT COMPRESSION

PRE AND POST PERFORMANCE_

PRE AND POST PERFORMANCE
COMPRESSION APPAREL

52% POLYAMIDE
47% ELASTANE
1% CARBON FIBER

59% POLYAMIDE
41% ELASTANE

- Powerskin Pre and Post Compression range combines two unique performing fabrics
- Powerskin Z-Raptor woven fabric with strong, durable Carbon threads, placed strategically for optimum vitalising compression and focused support
- "Sensitive" Italian knitted fabric for perfect blend of comfort and support
